

The future of building, Today!

# What is SIPS?

- On site solution for building of dream home BUILT TO FACTORY TOLERANCES
- It is a FLEXIBLE SYSTEM providing larger spans and openings demanded by modern dream home self-builders
- It is a rigid and HIGHLY ENGINEERED SINGLE SOLUTION to building a dream home
- It is a THERMALLY EFFICIENT solution, providing the best 'U' values or thermal insulation values in the industry
- It is a very AIRTIGHT structure which is one of the key elements in FABRIC FIRST approach in dream house design (which Allan Corfield will talk with you about later today)
- It is a FAST TRACK system of building taking typically 8-10 days to erect on site
- It is a cost-effective solution benefiting from factors like:
  - Off site construction
  - Factory tolerances on site
  - Fast track building

## Why Sips Industries Ltd?

- Sips Industries has been trading for almost 25 years & leads the market in SIPs construction
- We have completed over 1,500 self builds
- Unlike all other SIPs companies, Sips Industries Ltd provide the full service, in house
  - Full kit engineering
  - Design and technical drafting from Architect's drawings
  - CNC programming
  - Pressing of panels
  - CNC panel and timber cutting
  - Fabricate all steel
  - Dry fit in factory
  - Fully erect the kit on site
  - 'All inclusive' quote.
- Other SIPs manufacturers will carry out these 5 stages using subcontractors or consultants. \*

## *Working with ACA/ACS*

- Streamlined process'
- Companies that know and work together well.
- Your best interest at each company's core values.
- Designed and engineered with the same fabric first ethos.
- Over a decade of established design, engineering, technical expertise and on-site development.

Thank you for you time and  
happy building.
